- e Exercise: Challenges into initial Goals

7. Next Steps – Sheri Freemuth

- a Update on Existing Conditions Report
- b Public Outreach Event #2
- c CAC Meeting #3

CAC Member Homework – Please complete prior to meeting!

➔ Instructions: Please reach out to your social networks and ask for feedback on the draft vision statement and list of challenges provided below. Bring notes to share at the CAC Zoom meeting.

1. Explain to your friends and family the VISION statement was developed through a process with the CAC and the public outreach event. Ask for their insights and edits. Background information may be found on Website: [Planning and Zoning \(payettecounty.org\)](http://Planning and Zoning (payettecounty.org))

Draft VISION STATEMENT: *In 2040, Payette County is a thriving rural area that supports vital communities, conserves natural resources, and leverages a prosperous agricultural economy to ensure a healthy lifestyle for residents and visitors alike.*

2. Now review the draft LIST OF CHALLENGES, consider and prepare any comments or additions:
 - Addressing impacts of residential growth on agricultural use
 - Protecting farmland while allowing landowners to have control over their land
 - Helping older farmers who want to retire and young families who want to start farming
 - Working with cities to encourage commercial uses and residential subdivisions (where public services are provided)
 - Managing growth with proper planning
 - Protecting property rights
 - Finding a balance between home businesses and residents seeking solitude
 - Balancing new development while maintaining a rural lifestyle.
 - Supporting public safety for a growing population (law enforcement, fire/EMS)
 - Managing increased use of roads to ensure safety and efficiency
 - Finding new and diverse transportation connections (airport? commuter vans? bike/pedestrian paths?)
 - Providing sustainable work force job opportunities
 - Supporting small businesses; encouraging new shops and restaurants
 - Attracting new businesses and talent
 - Identifying appropriate sites for clean energy generating industries
 - Developing more community inclusive activity sites with parks, trails, sportsman access points and amenities, including recreational activities
 - Protecting waterways and providing more opportunities for public use
 - Protecting existing irrigation and drainage systems
 - Opportunities for existing and new residents to secure adequate and diverse housing
 - Providing opportunities for a diverse population
 - Providing a safe place to raise a family and educate our children
 - Supporting senior citizens through enhanced programs and livable communities
 - Supporting increased options for river and recreation access
 - Addressing energy development and prioritizing clean energy over oil and gas
 - Consider alternatives or modifications to the Transfer of Development Rights process
 - Addressing Impacts from the growth of traffic on Highway 95
 - Managing noise and light pollution impacts on quality of life
